Fetal Autopsy and Placental Examination as a Complimentary Tool

April 2018

● Priyanka Gogoi

Recurrent pregnancy loss (RPL) is defined as the loss of three or more consecutive pregnancies and affects 1% of couples trying to conceive; however, a definitive diagnosis is possible in only 50% of cases, and significant number of RPL remains unexplained despite intensive investigations of probable causes. The autopsy of the fetus as well the placental examination can help by providing ... [\[Show full abstract\]](#)

[Bland-White-Garland syndrome]

February 1977 · Terapevticheskii arkhiv

V D Rozenberg

A case of Bland-White-Garland's syndrome in a man aged 38 years, who for a long time had been suffering from a heart disease and who died suddenly, is described. At autopsy a well pronounced variant of the syndrome, congenital abnormal departure of the left coronary artery from the pulmonary trunk (artery) was noted.

Inclusion body hepatitis in chicken

August 2016

● D.Basheer Ahamad · ● Selvaraj Jayaraman · M. Sasikala · ● Babu Prasath

Inclusion body hepatitis (IBH) was recorded in 8 weeks old Giriraja chicken in Tamil Nadu. The clinical signs included dullness, depression, mild greenish diarrhoea with low morbidity and high mortality. On post mortem examination, the liver was enlarged, pale to pale yellow with scattered petechiae. Cytological examination of the liver revealed micro to macro vacuolar changes in the cytoplasm of ... Ho KC, Roessmann U, Straumfjord JV & Monroe G. Analysis of brain weight. I. Adult brain weight in rel...

January 1981 · Archives of pathology & laboratory medicine

 kin Chung Ho ·  U Roessmann ·  J V Straumfjord ·  Gerald Monroe

The weights of fresh brains obtained at consecutive autopsies over a period of five years were reviewed. Brains with lesions, such as large tumor, hemorrhage, infarct, or edema, were excluded. Analysis of the brain weight of 1,261 subjects, aged 25 to 80 years, show that the mean brain weight decreases in order from white men to black men to white women to black women. These differences are ... [\[Show full abstract\]](#)

Prevalence, abundance and site distribution of equine small strongyles in Normandy, France

January 2003 · Veterinary Parasitology

 Claire Marie Laugier ·  Hervé Hoste ·  Corinne Sevin ·  Philippe Dorchies

Forty-two horses from Normandy (France) were examined post-mortem for small strongyle infections from October to March. In the positive horses, total worm numbers ranged from 234 to 90,247 (mean 11,297). Encysted larvae represented the major part of the total cyathostome burdens with a high percentage (83%) being early third stage larvae. They were mostly recovered from the caecum (48%) and ... [Two autopsied cases of spinal cord infarction associated with subacute myelo-optico-neuropathy (SMO...

March 1975 · Nihon Naika Gakkai Zasshi

Tetsuji FUJIWARA · Kyôko SAIDA · Kôichi OGINO

Subacute myelo-optico-neuropathy (SMON)の臨床診断のもとに治療中、脊髄硬塞を来した2剖検例を報告した。症例1は経過中に再燃、視神経炎、Leriche症候群を来し、4年後に死亡。症例2は再燃増悪の時期に一致してRaynaud現象を来し1年3カ月の経過で死亡した。これら症例にみられた再燃は臨床的には非典型的であり、その後の経過も可成り複雑であった。著者らのSMON再燃症例(23症例、延32回)の分析からこのような非典型的な再燃の場合には、他臓器の疾患や他の神経系疾患の合併や増悪によるものである可能性があり、典型的な再燃に比べより慎重な鑑別が必要であることを述べた。また神経病理学的には、本症例のSMON病変が脊髄硬塞による二次的な所見であるとすれば、SMONに特有なsubacute combined ... Sport is gezond, of niet soms? Plotselinge dood bij kinderen tijdens inspanning

June 1996 · Tijdschrift voor kindergeneeskunde

A.S. Jaarsma · M.D. Talsma · H. Holl ·  Albert P Bos

Two patients are described with cardiac arrest during exercise. Autopsy in the first patient revealed a hypertrophic cardiomyopathy. With echocardiographic examination of the second patient an aberrant left coronary artery was found as a cause for his cardiac arrest. Acute cardiac arrest in children during exercise is in 50% of the cases due to hypertrophic cardiomyopathy and in 25% to an ... [\[Show full abstract\]](#)
