## Dr. M.S.Biradar - As I Remember

---

### • Dr. Kushal K. Das

It was a Sunday morning on March 3, 2019. We supposed to go to Atlanta, Georgia by flight number- KLM 6203, from El Paso, Texas. We had already received the boarding pass and completed our security process by border police. Flight was ready for departure and passengers were boarding the aeroplane, but my physical assistant was not seen anywhere nearby to push my wheel chair into the flight. My companion did not wait a single minute as my name was announced with a request to get into the flight at the earliest. My companion pushed my wheel chair and made me to move through aerobridge. Finally I was able to reach near the gate of the plane and by that time my physical assistant rushed to me from somewhere. Later with the support from the cabin crew I got inside the plane and took my seat.

Do you like to know who was my companion to take my care and pushed my wheel chair all the way to the aeroplane ? He was none other than Dr. M.S. Biradar, Honorable Vice-Chancellor of BLDE (Deemed to be University), Vijayapura!

This is not a single incidence to tell about Prof. Dr.M.S.Biradar but I have numerous stories of such kinds to tell about him. I remember, once we had been in Yerevan, Republic of Armenia to

sign an MoU with UNESCO Chair holder in Life Sciences [1]. On the day of signing the MoU I had fever and was feeling uneasy. After signing the MOU in the presence of UNESCO Science Policy Chief Dr. Fahmi Ahmed and UNESCO Chair holder in life sciences Prof. Sinerik Ayrapetyan we were coming out from the institute and about to board a cab. Suddenly I felt giddiness and was about to fall straight on the street. At that moment the hands of Dr.M.S.Biradar held me, rescuing me from almost a complete fall. He immediately raised the much needed alarm to nearby our Indian colleague Dr. M.Iqbal Alam (who was my junior at the University of Calcutta). Later, I was taken back to hotel where Dr. Biradar Sir examined me thoroughly (he was considered by the common man of Vijayapur as God of Medicine) and prepared a cup of tea and made me to have it with biscuits. During that time, I felt Dr.M.S.Biradar as not only my fellow companion but also my loving and caring elder brother besides being my physician too!

I remember the day when I joined BLDE (Deemed to be University) as a Professor of Physiology. It was three days before my joining in BLDE (Deemed to be University), I was invited by the then Vice-Chancellor Prof. B.G.Mullimani and Dr. M.S.Biradar who was the then Principal of Shri B.M.Patil Medical College, Hospital and Research Center. Dr. J.G.Ambekar, Registrar of BLDE (DU) and also my longtime friend asked me to meet both the Vice-Chancellor and the Principal in the evening. I reached the University around 7.30pm on June 20, 2013. I saw both - Hon'ble Vice-Chancellor and Principal of the Medical College being present there in the Vice-Chancellor's chamber. I was received with that pleasant smile of Dr. Biradar Sir and my appointment order as Professor of the University. Dr. M.S.Biradar asked me "what do you want to do now? What do you expect from us further?" I politely replied "Sir, I need to establish a laboratory exclusively for vascular physiology research! Sir, I need

the support from the university to get the laboratory at the earliest". On hearing my reply to a lucrative question, I remember, all the three distinguished University officials including the Vice-Chancellor started laughing and Prof M.S.Biradar Sir smiled again and told "granted". He wished me the best for all future endeavors and my journey at BLDE DU began. Later, in 2015, the Laboratory of Vascular Physiology and Medicine had been officially inaugurated and started its functions which is now a part of UNESCO/UNITWIN network for PhD education and research and the office of the Dean, UNESCO Chair holder in life sciences (Biophysics, Biotechnology and Environmental Health) [2]. Prof. M.S.Biradar Sir's deep involvement and continuous guidance for promoting basic sciences research made our medical college a unique one among 640 medical colleges of India in the area of research to be recognized by the world renowned Universities and institutes.

**Prof.Dr.M.S.Biradar (Rt.)with Prof.GustavoZubieta-Calleja (Lt.), Director, High Altitude Pulmonary and Pathology Institute (IPPA), La Paz, Bolivia and Bolivian Navy Chief (centre) during 7th Chronic Hypoxia Symposium, February-March 2019 in city of La Paz. BLDE (Deemed to be University) was the co-organizer along with Organizer IPPA, La Paz.**

I remember when the Laboratory of Vascular Physiology was working on "experimental stroke model", Dr. Sikha Saha,

Professor of Cerebrovascular Medicine at the University of Leeds, UK visited our University to work with vascular laboratory researchers. She trained all the researchers at vascular laboratory in the techniques of mid-cerebral carotid artery occlusion (MCAO) to prepare experimental stroke model. Dr M.S.Biradar, the Principal of Shri B.M.Patil Medical College and Dean of the Faculty of Medicine BLDE(DU) personally spent time along with the other research scholars to learn the techniques of developing ischemic stroke in rat model from Prof. Saha of the Leeds University [3]. Such was the egoless and humble scholarly attitude of Prof. Dr M.S.Biradar! One can hardly believe that a physician of Dr. M.S.Biradar's stature who was considered as 'God of medicine in Vijayapur' or 'clinician par excellence' was curious like a child to learn a new and novel technique along with other young researchers!!

One more incidence of the year 2017, I would like to share with all of you. Prof. M.S.Biradar- the Vice-Chancellor of BLDE (Deemed to be University) and myself were appointed as 'Visiting Professors at Tulane University School of Medicine, New Orleans ,USA. During this visit both of us delivered lectures for doctoral and postdoctoral students along with faculty members. In one such lecture, Prof M.S.Biradar had to present the statistics of hypertension patients in and around Vijayapur district as the research collaborative work of both the Universities needed those statistical values [4]. To our utter surprise, we all the scientists including one of the most renowned nephrologist Prof. Luis Gabriel Navar, observed how Dr. Biradar Sir explained the values and data of hypertensive, diabetic and hypertension with diabetes patients from each of the villages surrounding Vijayapur city without looking at the PowerPoint slides !! And the presentation made me so proud of my association with Dr. Biradar sir. With that God

gifted memory, he could remember so many stories, life's lessons and was able to narrate them in leisure hour, especially during a long journey with me ! He was a doctor par excellence, and an academican and a spiritual guru!

**Dr.M.S.Biradar is with Dr.Lee Hamm, Dean of Tulane University School of Medicine along with Prof.LuisG.Navar and Prof.D.S.A.Majid, Tulane University, New Orleans, USA (February 2017)**

He had an outstanding analytical mind. Perhaps, he could have achieved more if he was born in any privileged nation in the world. Though he had an humble background from a rural village named Ukkali in Vijayapur district, he became a medicine graduate and post graduate with gold medal and further attaining the position of a Vice-Chancellor of a medical University is a tremendous achievement in his life.

Today's many success stories of Shri B.M.Patil Medical College and BLDE (Deemed to be University) would have never been possible without a visionary, leader, academican and a man with a golden heart like late Prof Dr M.S.Biradar (1955-2021).

I salute and bow my head to our friend, philosopher, God and guide-Dr. M.S Biradar!
